

Since a young girl I have always loved fashion and always admiring my mums work

After my 3 years of study in fashion, I was honoured with the N.S.W. Government Scholarship award. This enabled me to study in Florence, Italy, at the Accademia Italiana Moda.

Through this incredible experience, I developed a passion for Illustration and painting, always signing my work as "Tritzia"

After 20+ years working and 10+ years teaching in fashion, I am also showcasing my work through greeting cards, prints and original artwork.

This work expresses my passion for children and the beauty of the human being and of life itself.

I hope that your Tritzia artwork will remain close to your heart forever.
